

DR. ROBERT MALONE - DARK VACCINE WIZARD

By Omar Jordan

The following information is a presentation of evidence, combined with **my opinions**, based on factual details available in the public domain. My opinions are based on the evidence. I do not claim to present an overarching or objective truth, and I encourage all readers to engage in their own research by following the links available in this document. It is up to each individual to research for themselves in order to determine whether or not your conclusions align with my assessment and analysis of the evidence. Consider this document a starting point to a larger body of research and more thorough investigation.

Dr. Robert Malone claims to be the inventor of mRNA vaccines and DNA vaccines; and a self-proclaimed world-wide expert in RNA technologies. It is actually Dr. Katalin Karikó and Dr. Drew Weissman who are more commonly

credited with laying the groundwork for mRNA vaccines, so right off the bat we have established that Dr. Malone [is a liar](#). Malone is the current “flavor of the week” for the conspiracy “truther” crowd who have trotted this demon out as their new savior in the neverending and false “fight” against the establishment. If so-called truthers could ditch these false prophets and start leading, we might be able to overcome the current hell we find ourselves in – but unfortunately most of those in the “truther scene” instead choose to continue following controlled opposition intelligence assets like Robert Malone and therefore remain stuck in the endless traps of false conspiracy leads, which is why I have to keep wasting time [writing these papers](#). So, let’s take a closer look at Dr. Robert Malone and try to determine if this is a man we can trust to lead the “resistance movement.”

From [this article](#), we learn:

Robert W Malone MD, was at the [Salk Institute](#) in 1987 and 1988. There, he pioneered in-vitro RNA transfection and also in-vivo RNA transfection in frog embryos, as well as mice. Malone’s research was then continued at Vical in 1989, where the first rat experiments were designed by him.

[The Salk Institute](#) was founded in 1960 by [Jonas Salk](#), the developer of the [polio vaccine](#) – so obviously we’re off to a very bad start.

*Dr. Malone carried on his research into **mRNA vaccination** during the 1990s, culminating in a mucosal patent that was issued in 2000. He also helped **revolutionize** the field of cationic liposomes for the use in RNA vaccinations, work that was far ahead of its time.*

*Malone says he has spent his **whole career seeking to develop fundamental enabling vaccine technologies, developing vaccines, and designing and managing vaccine studies.***

“Vaccines are my business. I am not an anti-vaxxer. I am a pro-truth, pro-safety, pro-bioethics vaccine developer. Vaccines save lives. They are often, but not always, our best hope for reducing the death and disease associated with many pathogens, and offer hope for treating cancer and other diseases.”

In less than 2 minutes, we have learned that not only does Malone love vaccines and believe that they save lives, but they are also his business. He admits openly to the world that he is not an anti-vaxxer and has spent the majority of his life developing vaccines.

He also claims to be responsible for inventing the mRNA technology used in the

current experimental COVID19 vaccines. Based on just this alone, one might say that Dr. Malone could just be the world's darkest demon. I could end this paper here and it would be enough.

*Both of these types of vaccines **employ technologies that involve transferring foreign genetic material into the cells of the person receiving the vaccine**, and making those cells essentially become miniature vaccine antigen manufacturing factories – inside the body.*

Robert Malone is the man responsible for creating the technology that transfers **foreign genetic material** into the cells of any victim who chooses to take one of his toxic vaccines. Now, I'm not going to get into the details about whether this is even possible (it's not), but let's just go with the official story.

[According to Wikipedia:](#)

Robert Wallace Malone is an American virologist and immunologist criticized for promoting misinformation during the COVID-19 pandemic.

Wikipedia is engaged in deception here. They want their readers to believe that Malone propagated “misinformation during the COVID-19 pandemic, notably making unsupported claims about the alleged toxicity of [spike proteins](#) generated by some COVID vaccines.”

Wikipedia is correct in saying that Malone was propagating misinformation but it's not misinformation because the spike proteins aren't toxic – it's misinformation because there is no such thing as a spike protein. We know that there is no spike protein for the simple fact that the virus in question has ever been isolated. If no virus has been isolated then no spike protein has been isolated either.

Given that there is no such thing as a spike protein, then it cannot be in a vaccine and therefore cannot be a toxic ingredient of the vaccine. So Wikipedia is telling the truth here, but they've placed the truth inside a box of lies and wrapped it with a pretty bow for us. Malone is deceiving the public by saying that the spike proteins “generated by some COVID vaccines” are toxic. That's not because they're *not* toxic, it's because they don't exist. So they can fact check each other and discredit each other but at the end of the day, **both sides are lying**.

In the 1980s, while a researcher at the [Salk Institute](#), Malone conducted studies on messenger

ribonucleic acid (mRNA) technology, discovering that it was possible to transfer mRNA protected by a liposome into cultured cells to signal the information needed for the production of proteins.^{[2][3]} In the early 1990s, he collaborated with [Jon A. Wolff](#), [Dennis A. Carson](#), and others on a study that first **suggested the possibility of synthesizing mRNA** in a laboratory to trigger the production of a desired protein.

Well, let's set aside these lies for a moment and look at his cohorts. Jon Wolff is another demon geneticist who received his undergraduate education at the spooky [Cornell University](#) and earned his MD from Johns Hopkins University. He also founded the biotech company [Mirus Bio](#). Mirus “focused on developing innovative non-viral **gene delivery** technologies for **gene therapy** applications” and “development of a genetic immunization method for research animals.”

Dennis Carlson is the co-discoverer of the CpG adjuvant that is used for hepatitis vaccination.

All 3 men are lifelong vaccine sorcerers. Until 2020, Malone was the chief medical officer at [Alchem Laboratories](#), a Florida based pharmaceutical company. As we learn from their contact us page, Alchem Laboratories “is a Contract Research Organization (CRO) that focuses on process **development and manufacturing of fine organic chemicals and drug substances.**”

Alchem comes from the word [“alchemy.”](#)

*: the discovery of a **universal cure for disease**, and the discovery of a means of indefinitely prolonging life*

: a power or process that changes or transforms something in a mysterious or impressive way

So not only is Malone a vaccine demon, but he's also a drug dealer. Prior to his work at Alchem, Malone was the Director of clinical affairs at [Alvancer Group](#) whose clients include Pfizer, Merck, Johnson & Johnson, Novartis, Wyeth and other Big Pharma giants and vaccine manufacturers.

He was also a member of the scientific advisory board of [EpiVax](#). EpiVax holds the exclusive license to the EpiMatrix **vaccine design technology**.

From [his LinkedIn Page](#), we learn that from **March 2010 - April 2013**, Robert

Malone worked for [Beardsworth](#) as the Medical Director of **Vaccines**. Beardsworth is a CRO that specializes in **vaccines**. Beardsworth also enjoys an alliance with [Intrials](#) – a **Brazilian organization** dedicated to clinical trials offering resources and services for clinical research development in **Brazil**.

So what more can we learn about this Brazilian company Intrials? In this 2008 [power point presentation](#) titled “Role of the Domestic Biotech Sector in Health Product Commercialization in Brazil”, we can see [Intrials](#) listed with a bunch of other Brazilian Firms and Institutes who participated in the study.

Brazilian Firms / Institutes Participating in the Study

[McLaughlin-Rotman Centre
FOR GLOBAL HEALTH]

Sao Paulo

1. Eurofarma
2. Butantan Institute
3. Aché Laboratórios Farmacêuticos
4. Recepta Biopharma
5. PeleNova Biotechnologia
6. **Intrials** Clinical Research
7. Coinfar
8. Biolab Farmaceutica
9. Uniao Quimica

Recife

1. Hebron
2. Biogene

Belo Horizonte

1. Labtest Diagnostica
2. Katal Biotechnologia
3. Biom Technology
4. Biocancer

Campinas

1. Scylla Bioinformatics

Porto Alegre

1. FK Biotechnologia

Rio de Janeiro

1. Fiocruz (Biomanguinhos & Farmanguinhos & CDTs)
2. Silvestre Labs
3. Cryopraxis Criobiologia
4. Nortec Quimica
5. Gross Laboratories

UHN | MCMM at University of Toronto

[Eurofarma](#) is a Brazilian owned multinational Pharmaceutical company. On [this page](#) we can see them pimping the flu vaccine.

[Butantan](#) supplies the Brazilian public health system with 65% of all vaccines.

[Aché Laboratórios Farmacêuticos](#) is among the three largest pharmaceutical corporations in Brazil.

[Recepta Biopharma](#) (ReceptaBio) is a Brazilian biotechnology company dedicated to the research and development of new drugs for the treatment of cancer.

[PeleNova Biotechnologia](#) is another Brazilian owned global pharmaceutical company.

[Coinfar](#) is a venture of three Brazilian Pharmaceutical companies, dedicated to drug discovery and development.

[Biolab Pharma](#) is another pharma company dedicated to researching, developing, producing and commercializing drugs.

[Uniao Quimica](#) seems to be another pharmaceutical company as well.

Beardsworth was [acquired](#) by TFS International (HQ in Sweden) in April, 2013 (the same month that Rabort Malone left the company). TFS **conducts clinical trials for pharmaceutical, biotechnology and medical device companies**. In 2015, TFS was acquired by a Swedish Private Equity Company called [Ratos](#) (60% of shares).

[This paper](#) tells us that the “first confirmed case of Zika virus infection in the Americas was reported in **Brazil** in May 2015, “although phylogenetic studies indicate virus introduction as early as 2013.” [WikiPedia confirms](#) that the “outbreak” began in April 2015.

Hmmm. That’s interesting. The Zika “outbreak” started right after Malone left Beardsworth, and Beardsworth had an “alliance” with a Brazillian company called Intriails who works with a bunch of other Big Pharma and vaccine companies?

Now if you are familiar with the Zika Virus scam, this should be a major red flag (as if everything else so far wasn’t a major red flag). If you’re not familiar with the so-called Zika virus scam, then search [this paper](#) for Zika and follow the links. I find it at least a curious coincidence that Malone was the Medical Director of

Vaccines, presumably working with this other Brazilian company, Intriails, in some capacity – and then right after he left, the Zika “outbreak” happened.

We also learn from [his LinkedIn](#) that Robert Malone was the CEO of Atheric Pharmaceuticals from 2016-2017. [His wife Jill was the Vice President](#). While they were both there for only a year, it was during his tenure as CEO that “Atheric Pharmaceuticals was contracted by the [United States Government](#) to **assist in the development of a treatment for the Zika virus by evaluating the efficacy of existing drugs.**”

WHAT?

Wait, so let’s get this straight – In 2010, Robert Malone joined a company called Beardsworth as Medical Director of Vaccines. Beardsworth had an “alliance” with another company in **Brazil**, called **Intriails**. Malone left Beardsworth in 2013, right before the Zika outbreak started, and then he and his wife joined a spooky startup company called Atheric Pharmaceuticals, in 2016, just after the Zika “outbreak” and contracted with the US Government to assist in the development of a treatment for Zika?

Well, maybe that’s just a coincidence but is it also just a coincidence that Atheric is located in **Virginia**? Funny how these spooks all seem to live in the same general area, right down the road from Langley (**Correction - 2 hours from Langley**). There also seems to be a 3 year gap in his resume between the time he left Beardsworth in 2013 to when he joined Atheric Pharmaceutical in 2016. So what was Robert Malone doing for those three years? Presumably he was “consulting”, as “CEO, Analyst and Consultant” at RW Malone MD, but who was he consulting for and what projects was he involved in? Well, we’ll find out more about that soon...

Atheric was founded in 2016 and was [out of business](#) by [2018](#). They were [listed](#) as having an office at 2981 Zion Rd, Troy, VA 22974, which is this was officially listed as once [Jill Malone's residence](#).

HMMMM

So this startup Pharma company sprung up out of nowhere, in **Virginia**, – with Malone as the CEO and his wife as the VP, contracted with the US Government to help them run their Zika scam in Brazil, and then shut down 20 months later? And this was their office?

Well, isn't that interesting? It looks and sounds like a front or shell company to me. You know what else is interesting? This [2016 paper](#), which was co-authored by Robert Malone where they discuss “reports of high rates of primary microcephaly and **Guillain-Barré syndrome associated with Zika virus infection** in French Polynesia and Brazil. But there was no Zika virus. Zika related illnesses [were caused by something else](#).

So, who was Robert Malone *really* working for?

Another interesting thing worth noting is that between November 2015 and January 2016, over 4,000 babies were born in Brazil with [shrunken brains!](#) Of course this was blamed on Zika, but Brazillians aren't stupid. They understand that the *real* cause was most likely the [TDAP vaccine](#).

*A new TDAP shot Brazil **made mandatory at the beginning of 2015**, which coincides with perfect timing with a whole bunch of newborns being born with defects. That's right, in late 2014 the Brazilian minister of health announced a new Tdap shot to become mandatory for all expectant mothers as soon as Brazil received it, which ended up being in early 2015. No zika found in a majority of messed up babies, but ALL MOTHERS WITH MESSED UP BABIES GOT THAT NEWLY FORMULATED SHOT WHILE PREGNANT. Troubleshooting 101, the answer is obvious. [Source](#) and [here](#).*

The TDAP vaccine was never reviewed for carcinogenic or mutagenic results, nor their ability to cause infertility. [The FDA's own website](#) admits this in a package insert from 2005. It also admits that the TDAP vaccine can cause autism and a bunch of other weird illnesses. So, like Ebola, COVID19 and others, we can see another example of a correlation between a strange illness that coincides just after a mass vaccination campaign.

That's how these sorcerers conduct these scams. They poison the population with toxins via pesticides, insecticides, toxic food or vaccines and then blame the illnesses on invisible viruses that nobody can prove actually exist. Then they run a series of racketeering schemes to sell new drugs and vaccines to treat the illnesses that their last round caused. Then they repeat this scam for hundreds of years and the public never catches on because they are invested in the pseudoscience of Virology and the religion of Germ Theory. Dr. Robert Malone is one of these dark wizards and we can see his [fingerprints](#) all over this Zika crime. [Read the papers he wrote](#), then combine it with the information in this paper.

From [his website](#), we also learn that Dr. Malone consulted extensively with the US and Brazilian Governments on how to control the Zika “pandemic.”

*Members of the **Zika Response Group** have performed epitope mapping and computational biology analyses, showing the evolution of the **virus - which will lead to a better vaccine** and a better understanding of how the **disease is causing damage to fetuses**, as well as the mechanisms of action of GBS. This effort culminated in two peer reviewed papers being published. The Evolution of the Zika Virus paper, published in the fall of 2016, is one of Wiley's most read scientific articles, and is in the 99% of their top publications- with 72,000 readers having already viewed the paper. **Dr. Malone was one of the lead authors of this study.***

“Malone traveled to Geneva to consult with the World Health Organization, and foreign public health officials on how to control the pandemic.” Normal folks would read that and conclude that Malone is an altruistic humanitarian. But if we

understand that there is no such thing as “Zika Virus,” then we also can come to understand that this man is conducting black magic sorcery and is involved in the maiming and murder of innocent Brazilians, most of them children.

His website also tells us that Malone “discovered possible anti-viral drugs that are safe for pregnant women and designed clinical trials, and are in the process of procuring funding and building partners in Latin America to move forward with clinical trials!” Oh, how wonderful! Note how they make it sound so exciting! As if there is such a thing as an “anti-viral” drug that it safe for pregnant women or any human. Perhaps we should interview all the mothers who had babies born with shrunken heads and see what they think about that! Oh, I’m sure it had nothing to do with drugs or vaccines, it was anything in the world but those two things!

From his website, we also learn that Robert Malone was awarded approximately \$30 million in grants for various projects in 2015, related to the Ebola “epidemic.” As usual, he worked with governments and Big Pharma giants to help develop another poisonous vaccine, generating tens of millions of dollars in profits for those companies! What a guy!

Now, if we understand [the truth about Ebola](#), then we also understand that this

man is involved in criminal activity and has the blood of thousands of Africans on his hands.

In 2014, Malone was awarded approximately \$50 million in grants.

[Soligenix](#), with the help of RW Malone MD, LLC, won a 25 million dollar NIAID contract for "Development of Vaccine Formulations Effective against NIAID Priority Pathogens."

*With support from RW Malone MD LLC, SAI Med Partners has been awarded preferred vendor status by one of the **largest pharmaceutical companies in the world**. We look forward to continuing our productive collaboration with SAI during 2015 and beyond.*

*In total, RW Malone MD LLC, LLC helped win **four major federal HHS contracts this year!** In total, the value of these contracts **adds up to hundreds of millions of dollars, adding to the well over 1B\$ in federal awards obtained with our assistance**. RW Malone MD, LLC played a **major role in all four contracts**, by providing proposal development, subject matter expertise, project management assistance and clinical trials design.*

So Robert Malone has helped multiple Big Pharma companies land huge contracts with the US Government, totaling over \$1 billion in 2014 alone! Now he wants us to believe that he's just an honest guy, "blowing the whistle" on his Pharma buddies. Yes, yes. He is protecting the public from the same vultures that he has spent his entire career working for, who have paid him millions of dollars.

In 2013, the grants totaled approximately \$435 million.

Robert W Malone, MD, MS Five Year Performance: Grants and Contracts	Role	Year Awarded	Amount
Soligenix Receives Additional NIAID Funding to Advance Development of Heat Stable Ricin Vaccine Awarded \$4.3M to Support Manufacturing Activities	Tech Watch: proposal development. Proposal manager and Technical Proposal lead author.	2016	\$4.3 Million
IDIQ Award to TASC by U.S. Army for Medical Product Research and Development. (W81XWH-15-D-0042)	Capture manager, lead author.	2016	\$5 Billion
Awarded to BioProtection Systems (New Link Genetics): DTRA Contract for Ebola Medical Countermeasure.	Capture manager, Proposal manager lead author.	2015	\$8 Million base, \$5.2 M option
Awarded to What a Smoke: Development of a Standardized Electronic Cigarette for Clinical Research	Proposal manager and Technical Proposal lead author.	2015	\$350,000
Award to BioProtection Systems (Newlink): contract to support the development and manufacturing of its VSV-EBOV (Ebola) vaccine candidate, including a new 330-subject Phase 1b study. Options for base grant.	Capture Manager, Proposal manager and Technical Proposal lead author.	2015	\$18 Million
Award to BioProtection Systems (Newlink): contract to support the development and manufacturing of its VSV-EBOV (Ebola) vaccine candidate, including a new 330-subject Phase 1b study.	Capture Manager, Proposal manager and Technical Proposal lead author.	2014	\$30 Million
Award to Soligenix: NIAID contract for "Development of Vaccine Formulations Effective against NIAID Priority Pathogens." (HHSN272201400039C)	Proposal manager and Technical Proposal lead author.	2014	\$24.7 Million
Awarded to Kai Research and Benchmark Research: contract for Support Annual Influenza Vaccine Serology Testing - for the CDC.	Developed the plan, assembled the team, formulated the contract and helped produce the final product.	2013	\$2.8 million base period, 5 total renewable years
IDIQ Award to Excelis: Combating Weapons of Mass Destruction Research and Technology Development from Defense Threat Reduction Agency. (HDTRA1-14-D-0005)	Capture manager, lead author for CBRN section.	2013	\$4 Billion
Awarded to Nanotherapeutics: Defense Department contract for Medical Countermeasures Advanced Development.	Original thought leader, Pre-Proposal manager and Technical Proposal lead author.	2013	\$427 million
Awarded to Vaxin: Contract by BARDA to develop next generation Anthrax Vaccine.	Proposal manager and principal scientific author.	2011	\$21 million
TOTAL Flexible IDIQ Awards		2011-2016	9 Billion
TOTAL Award Amounts (excluding IDIQ awards)		2011-2016	566 Million

Here are some more examples of projects that Malone was involved in, primarily related to vaccines.

- Proposal management services for Soligenix: Submission of a large contract to: NIAID Contract Proposal for **Thermostable Ricin Vaccine**, Fall 2013
- Proposal management services for a large IDIQ contract for a large technology company, including team building, management of the technical proposal and scientific writing.
- Conference Organizer and Coordinator: MODELING WORKSHOP, 2013
- Due Diligence for a **large pharmaceutical company on influenza vaccines**, 2012-13.
- Chairperson and reviewer for **NIH/NAIAD** Committee on Partnerships in Biodefense **Immunotherapeutics**, Fall 2011. Robert W Malone, MD, MS
- Committee member and reviewer for NIH/NAIAD Committee for Development of Technologies that Accelerate the **Immune Response to BioDefense Vaccines**. 2011
- 12-14 July 2011 - **The World Health Organization (WHO)** hosted the second Consultation on the Global Action Plan for **Influenza Vaccines**. Invited speaker: Robert W Malone, MD, MS "**Vaccine Production Strategies**"
- Successful submission and funding of a **80 million US government contract** to a **biotechnology client** in 2011 - proposal manager and chief scientific writer.
- Successful submission of three white papers to a **government agency in 2011**
- Medical Director, **Vaccines**, under contract & consultant with Beardsworth 2009 - 2013
- Provided significant technical due-diligence for a **fortune 500 company** pursuing **infectious disease opportunities** in the fall of 2009.
- Proposal manager and editor for URI and **Epivax's** funded submission of U19 grant for \$13 million from the National Institutes of Health to pioneer the development and application of an integrated gene-to-vaccine program targeting emerging infectious diseases. 2009.
- Medical director under contract and consultant with **Accelovance** 2008-2009. While in this position, Accelovance was awarded the title of "Best Contract Research Organization" (CRO) award at the **2009 World Vaccine Congress**.
- Author, editor and capture manager for Accelovance of funded **\$3 million CDC contract** for **influenza vaccine immunogenicity** clinical trial.
- Proposal manager and editor for Chesapeake **PERL's funded** submission and funding in October 2009 of the **US Army** SBIR Grant Year II: Commercialization Pilot Program (CPP), Improved Protein Manufacturing in Insect Expression System - Develop HIV-1 Envelope Proteins as **HIV Vaccine Antigen**
- Proposal manager and editor for Chesapeake **PERL's funded** submission and funding in June 2009 of the **Department of Energy** SBIR Grant Phase II: Identification, Production and Characterization of Novel Lignase Proteins from Termite for Depolymerization of Lignocellulose.
- Public health survey of experts for a **large pharmaceutical corporation**, regarding **governmental vaccination strategies**. 2009
- Scientific Advisory Board member of a mid-sized biotechnology company.
- Member, NIH Committee for **Biodefense Vaccine Enhancement**, 2008.
- Public health survey of experts for a **large pharmaceutical corporation**, regarding **governmental vaccination strategies**. 2008
- Protocol Author and Clinical Director of a large **Influenza** Phase 1 Clinical Trial: FDA had no revisions on initial IND review. 2007

- Proposal manager and editor of a funded submission of an **influenza** Contract through HHS: total budget **130 million**. 2006
- Successful submission of a **CDC foundation award** for TB: total budget one million.
- Provided due diligence for a **large financial institution involving venture capital for significant late-stage biotechnology investment**.

What we have established here is that Dr. Robert Malone might just be the darkest vaccine warlord on the planet. It's also worth noting that Malone serves as a [consultant](#) to a **Pentagon-funded program** that develops medications to protect American troops from "biological threats." But since we already know that the entire concept of "biological threats" is a fraudulent one, then it's easy to see this for what it *actually* is, which is a giant money laundering operation, like almost everything else the US Government and Pentagon are involved in. Malone was also pimping his heartburn medication last summer as a possible treatment for COVID. He got \$21 million to conduct a study on it.

That's right, [he says](#) he got a call on Jan. 4, 2020 "from a fellow American doctor working in China, Michael Callahan, who told him about the new virus causing severe respiratory illness. Malone then ran the "virus's genetic sequence" through computer models designed to find already-approved drugs that might work to thwart the virus, he said. Famotidine turned up as a promising lead." [Famotidine](#) (Pepcid) is made by Malone's company, of course.

Ahh yes, so he just happened to get a call and ran the fictional "sequence" through "computer models" to see if there was a match, and just by mere coincidence, the drug that [his company developed](#) turned up as a "promising lead." What good fortune for him, huh? What do you suppose the odds are of such a thing working out in his favor in such a way? One in a trillion? Probably just a freak coincidence, I suppose.

*Federal pandemic response scientists at HHS' Biomedical Advanced Research and Development Authority, or BARDA, were shut out of these early conversations over famotidine. Rick Bright, BARDA's director at the time, would later **file a whistleblower complaint** alleging **unethical conduct** by agency leadership, and point to the **Pepcid trial as a key example**.*

*Malone **resigned** as Alchem's chief medical officer **the week the company got the testing contract**. He complained of a difficult work environment, and has since been critical of Callahan and the project.*

“The Northwell trial is just a zombie at this point,” Malone said. “Completely irrelevant, except in a negative sense.”

MMMmmmmHmmmm.

Next, let’s take a look at a [recent interview](#) he did with Steve Bannon (who called this maniac a ‘voice of reason’)..

In this interview, we will hear Robert Malone tell all the usual lies about “viruses”, “variants”, “mutants”, “antibodies” etc. We will also hear him discuss some of the problems with other vaccines in history that caused injuries and deaths. This is the standard bait-and-switch technique that we’ve seen over and over again from these deceivers. *These vaccines are dangerous! We must make them safer (less dangerous) so that they can be brought up to the acceptable standards of all of our other vaccines! Then we can make hundreds of millions of dollars and we can all feel good that we’re saving lives with our safer vaccines!*

Their transparent, amateurish scam is crystal clear for all who are paying attention and understand their strategy. Robert Malone, like other fake opposition agents, is only *pretending* to blow the whistle on the new “experimental” vaccine. This head fake is ultimately used to *normalize* all other vaccines and drugs, which he deems as “safe.” You know, like the ones *he* develops and sells for millions of dollars.

Notice how he says that those who are in the “waning phase of the Pfizer vaccine **seem to be getting infected.**” Well, are they getting infected or not? In other words, he is selling the lie that these people who took the Pfizer vaccine are now – several months later – getting infected with “Coronavirus.” Rather than admit what is obvious to everyone who understands what this fake pandemic is really about – the vaccines are actually causing these illnesses – he sells this outrageous whopper of a lie. He *knows* that nobody can actually *prove* that there is “infection” happening, so he says that they “**seem to be.**” Well, here’s the truth. Viruses do not cause disease. There is no such thing as a virus. Disease is caused by toxicity. **If** there are any elevated numbers of sick people, the *most likely* cause is something in the vaccine they just took. A 5-year old can figure this out.

The reason he says this nonsense is because he is protecting all of his friends

and the entire industry. He is a Big Pharma loyalist and a vaccine/drug salesman.

Malone says he sees the worst case scenario playing out where “the vaccine in the waning phase is causing the virus to replicate more efficiently than it would otherwise, which is what we call antibody dependent enhancement.”

Oh, here we go. It's not the toxic poison that's in the vaccine that's causing illness, it's that the vaccine causes **the virus** to replicate more efficiently than it would otherwise – and what do you think will be the solution for that? Well, a better and more effective vaccine of course! Clearly this druid has no issues at all with the *concept* of vaccines as a safe and effective way to prevent disease. He thinks vaccines are necessary to combat “coronavirus.” But because *this* vaccine was rushed, it is causing the virus to “replicate more efficiently than it would otherwise.”

By “otherwise,” he is implying that if the necessary safety studies had been performed – perhaps if Trump had hired *him* or contracted one of his intelligence shell companies – we'd have a safer vaccine and none of this would be happening.

But he's also setting up an argument that will be easily debunked by the mainstream liars because the vaccine isn't going to cause the virus to “replicate more efficiently,” for the simple fact that **there is no virus!** So they will come in and debunk his lies with their lies and then discredit the rest of us along with him.

Next, Bannon clarifies that Malone is **not** an anti-vaxxer and has dedicated his **entire life** to safe vaccines in every level of his professional life.

Bannon: “Your entire life is in support of trying to get vaccines that help mankind, correct.”

Malone: “I'm the opposite of an anti-vaxxer, I'm a true believer. But I'm also

committed to **safety and good science.**”

These are the people that the mainstream media labels as “dangerous extremists” who are spreading “harmful misinformation.” Hardcore, pro-vaccine “believers” like Robert Malone. By employing Malone as a soft “whistleblower”, the powers that be are using him to set an artificial limit as to what is an acceptable level of dissent or opposition to their obvious mainstream lies and deception. When they censor him, then all of the truthers go running into his arms for comfort. They do this because they conclude that if he’s being censored, he must be telling the truth. That’s how the bait-and-switch works.

In this example, they’ve taken one of the darkest vaccine wizards on the planet, and with a quick sleight-of-hand trick, made him the “extremist” opposition voice and labeled him as an anti-vaxxer! But he doesn't represent the true opposition (us) - he’s an insane demon who thinks vaccines save lives and has spent his entire life creating these elixirs of death and destruction.

So what do you think they will label normal, rational, sane people like us – who understand that there **is no such thing as a safe vaccine** – people who just want to be left alone and live healthy lives, far far away from people like him?

FAR RIGHT WING, EXTREMIST DOMESTIC TERRORISTS!

Do you see how this is a [War on Reality?](#) They’ve flipped reality upside down by making this warlock seem like he’s on the fringe of society with his hardcore pro-vax views! But this guy doesn’t represent healthy people, he wants nothing more than to see EVERYONE ON THIS PLANET injected with his disgusting toxic potions, as long as they live up to the safety standards that *he* deems appropriate. As we’ve learned, there is not a single person in the entire so-called “resistance” or “anti-vaccine” movement that actually represents the view that all vaccines are dangerous.

THEY ARE ALL HARDCORE PRO-INJECTION VIRUS BELIEVERS.

They are engaged in a psychological warfare campaign which moves the goal posts away from what is normal and redraws the boundaries to make these insane goblins seem like “extremists” to the COVID lovers and “reasonable

voices” to the fence-sitters or those who don’t understand that all vaccines are dangerous, there are no viruses and disease is caused by toxicity.

The “experimental” unsafe mRNA vaccine is the mechanism that is used to employ this strategy. By labeling it as unsafe, and enveloping it in a cloud of fear and uncertainty, they accomplish this goal of shifting reality and redrawing the boundaries, while at the same time normalizing *regular* vaccines as safe in comparison, and thus strengthening and legitimizing all of Big Pharma and the vaccine industry.

An experimental, unsafe vaccine is a **godsend** to vaccine companies and dark wizards like Robert Malone because it will only help them in the long run. All other vaccines will be heralded and praised in comparison to the unsafe vaccine.

Malone says he’s committed to “good science,” which is another lie. If he was *really* committed to good science then he would demand that the necessary experiments be performed – to not only properly isolate the virus – but to show that it causes the disease with negative control groups. Malone should be informing the entire world that this hasn’t happened. If he was *really* committed to science, he should be screaming from the rooftops about it. It should be the focus of this entire interview. But he will never do that, because then the entire fraudulent field of virology would be exposed, and his crimes against humanity would be clear for all to see.

Recently, Malone told Fox News that he believes the risks associated with the mRNA COVID-19 vaccines outweigh the benefits **among children**. In other words, he thinks they’re **just fine** for adults, including the elderly!

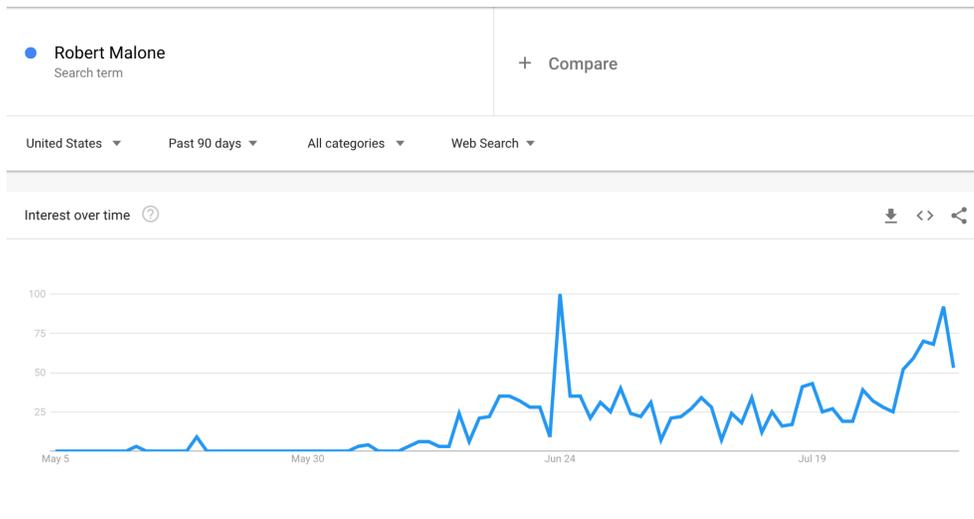

“Vaccines save lives. These vaccines have saved lives,” Malone said.

So he even thinks that the **COVID vaccines** are saving lives! What an absolute joke! Now, given what we’ve learned about Robert Malone’s career, connections, accomplishments, beliefs, and conflicts of interest, do **you** think he is an honest and sincere whistleblower, warning the public about the dangers of vaccines? Or is he engaged in a cunning and elaborate limited hangout, controlled opposition campaign, designed to control out the discourse, discredit the skeptics, and give legitimacy to his friends in Big Pharma, the Pentagon and the US Government? I

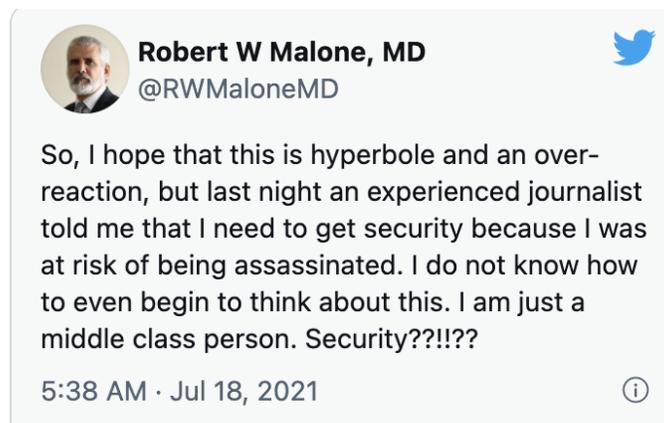

have my opinion. It's up to you to decide what you think Robert Malone's *real* motivations and intentions are.

UPDATE (8/6/21)

Robert Malone's LinkedIn was "shut down", so those links won't work anymore. He has set up a [new account on Gab](#) because he's afraid Twitter might shut him down. This is all an example of faux-censorship, don't fall for it. Malone will have more of a prominent voice now than ever – and will likely continue making the rounds with interviews, podcasts, etc. He probably has multiple book deals already signed.

Here's another amusing Tweet from Dr. Malone.

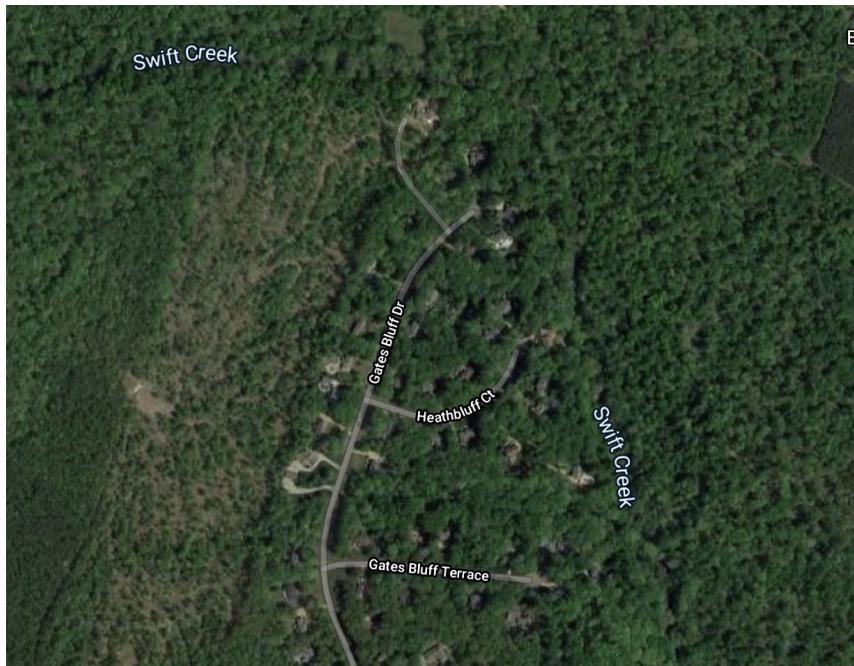

So let's ask a very simple question - who would assassinate Dr. Malone? Moderna? Pfizer? Their stocks are SOARING. Nothing he says is going to change any of that. The CIA? Why would they assassinate one of their own? Nothing this guy has said is going to challenge Big Pharma in any way. The suggestion that he is "blowing the whistle" is an illusion. It only looks damaging for them on the surface. But if we understand the long-con, we can see clearly that this is only going to strengthen the vaccine program and Big Pharma. Remember, Dr. Malone is a **true believer**. He is 100% pro-vaccine, he's one of them. Why would anyone *assassinate* him? Please understand that any assassination story that might happen is going to be a fake one.

Then notice the little bit where he says he's just a "middle class person." Right. How much do you think Dr. Malone has made over the years brokering all of those high profile Big Pharma and Government deals? He makes it sound like he's just scraping by? Please consider that Dr. Malone is the owner of [nine pharma related patents](#). Big Pharma companies probably pay pretty well for the rights to use his patents. Please also consider his lengthy career in Big Pharma leadership positions. Do you think the US Government paid him minimum wage when he was CEO at Atheric Pharmaceutical? Do you think he walked away with nothing when TFS International purchased Beardsworth? How much do you think his salary was as Chief Medical Officer when he was at Alchem Laboratories? This guy is trying to paint himself as an average Joe when he's anything but that. Here is a photo of his home, in a wealthy, secluded **Virginia** neighborhood, right down the road from CIA Headquarters.

CORRECTION - CIA HEADQUARTERS IS 2 HOURS AWAY.

He also owns another home about 10 minutes away. I wonder how many other properties he owns? Oh, I'm just an honest, middle class guy, fighting for the truth.

Middle class, my ass.

UPDATE 8/31/21

BEHOLD! A WHITE HORSE!

Today, Dr. Malone published [this video](#) complete with ominous camera filters and white horse symbolism. Undeniable mockery. You can try to deny your intuition and believe that this dark shadow or a man is on your side, if you like. No judgements from me. But for those of us paying attention, it should be obvious what this Demon is all about.

Christianity describes the First Horseman of the apocalypse riding a white horse, given the task of “conquering and to conquer.”

Revelation 6:2 - And I looked, and behold, a white horse! And its rider had a bow, and a crown (Corona) was given to him, and he came out conquering, and to conquer.

Revelation 19 - “Then I saw heaven opened, and behold, a white horse. The one sitting on it is called Faithful and True, and in righteousness he judges and makes war. His eyes are like a flame of fire, and on his head are many diadems, and he has a name written that no one knows but himself.”

Revelation 6:8 - And I looked, and behold a pale horse: and his name that sat on him was Death, and Hell followed with him. And power was given unto them over the fourth part of the earth, to kill with sword, and with hunger, and with death, and with the beasts of the earth. (King James Bible)

Revelation 19:11 - "Then I saw heaven opened, and behold, a white horse! The one sitting on it is called Faithful and True, and in righteousness he judges and makes war."

Some may also remember these images from May, 2020. Do you think it's all just a matter of coincidence?

A convoy of coaches carrying British nationals evacuated from Wuhan

Images from the UK base showed how ambulance crews met passengers, including a number of young children, on the tarmac as they disembarked from the aircraft after a lengthy 12-hour journey.

British passengers were being taken by bus to Arrowe Park Hospital on the Wirral, where they will spend the next fortnight.

They will be housed in an NHS staff accommodation block with access to the internet for a quarantine period of 14 days.

UPDATE 9/27

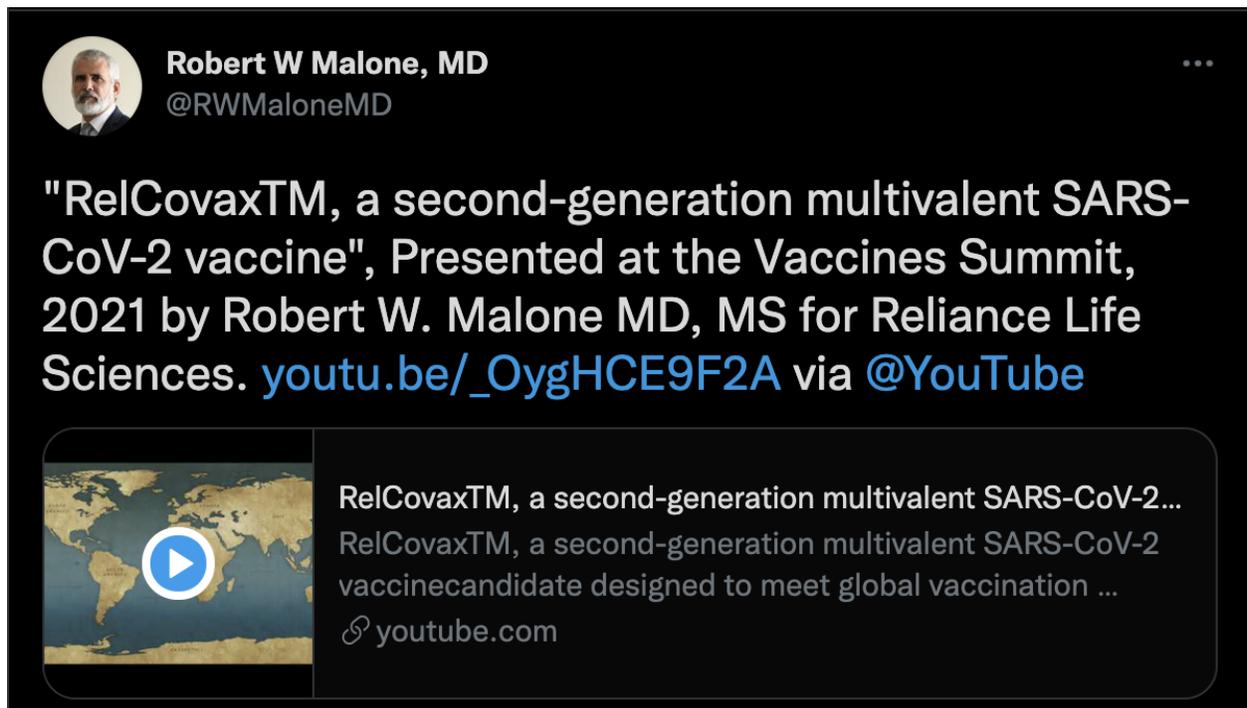

Well, well, well - Look what we have here.

Exactly as I predicted, this Dark Warlock has now announced a NEW COVID Vaccine! This one will be safe, we promise!

Now - how was I able to predict this? It has nothing to do with intelligence, it was OBVIOUS that this person would betray the very people he pretends to be fighting for...it was *easy* to predict.

Let's get clear and tap into our intuition. None of these people are on our side. They are all PROSTITUTES for Big Pharma.

Here's Malone's [latest interview](#) where he admits he took the COVID vaccine, thinks it's safe for some people, but wants to warn everyone else that it's not safe. What a god damn joke. Anyone trotting this evil sorcerer out as some sort of legitimate leader for the resistance movement needs to take a long hard look at themselves in the mirror.

"RelCovax™, a second-generation multivalent SARS-CoV-2 vaccine", Presented at the Vaccines Summit, 2021 by Robert W. Malone MD, MS for Reliance Life Sciences. youtu.be/_OygHCE9F2A via @YouTube

 RelCovax™, a second-generation multivalent SARS-CoV-2...
RelCovax™, a second-generation multivalent SARS-CoV-2 vaccine candidate designed to meet global vaccination ...
[youtube.com](https://www.youtube.com)

And just for good measure, here are some more tweets and ridiculous statements by Dr. Malone.

Just to be clear, so there is no confusion; I am involved in both second gen SARS-CoV-2 vaccine development as well as repurposed drug development for COVID-19. Four clinical trials starting shortly. Three large treatment trials (high dose famotidine + celecoxib) and one vax Ph1....

“Once again – I am not an “anti-vaxxer” (a term that I loathe). I am pro-bioethical, safe, effective and appropriately targeted vaccine development and deployment. SARS-CoV-2 vax for high risk persons. Not universal vax.”

[Here is the Google Cache](#), for the above statements, so you can see for yourselves.

A screenshot of a Twitter post. At the top left, there is a red pushpin icon and the text "Pinned Tweet". Below this is a circular profile picture of a man with a beard and glasses. To the right of the profile picture, the name "Robert W Malone, MD" and the handle "@RWMaloneMD" are displayed. A red oval highlights the name and handle. The main text of the tweet reads: "OK folks- looking forward, what do we need if we have accepted protocols for early outpatient treatment?" followed by a numbered list: "1) CDC has to get its act together.", "2) We need very active surveillance, tracing, testing", and "3) We need the ability to test (ideally self-test) for SARS-CoV-2 infection". The words "tracing, testing" in the second item and "self-test" in the third item are redacted with red bars. At the bottom of the tweet, it says "11:10 PM · Aug 5, 2021 · Twitter Web App".

@RWMaloneMD

OK folks- looking forward, what do we need if we have accepted protocols for early outpatient treatment?

- 1) CDC has to get its act together.
- 2) We need very active surveillance, tracing, testing
- 3) We need the ability to test (ideally self-test) for SARS-CoV-2 infection
